Nigeria Renewable Energy Update – Q3 2019

Aug 30, 2019

Data Source: ***NBET National Renewable Energy Data & Carbon Accounting Dashboard***

The Africa Energy Portal is pleased to announce that Nigeria's renewable energy information is now powered by a prime national data pipeline—the National Renewable Energy Data & Carbon Accounting Dashboard, developed by the Nigerian Bulk Electricity Trading PLC (NBET) in collaboration with the Federal Ministry of Power. This first-of-its-kind platform in Africa aggregates, validates, and analyzes real-time renewable generation statistics, project performance data, and carbon offset calculations.
